UPGRADE

(1) And save changes.

Code Injection

(1) Code Injection and Inject header AllAxis Javascript code at the end (if you have already a code)

HEADER

Enter code that will be injected into the 'head' tag on every page of your site.

```
1 <!-- Import All Axis Javascript Code (version 1.4) -->
2 <script
3   async
4   src="https://storage.googleapis.com/allaxis/allaxis.1.4b.min.js"
5 ></script>
```

FOOTER

Enter code that will be injected into the template-defined footer on every page of your site.

1

Dawid Planeta
dawid@allaxisstudio.com

AllAxisTest

Select space and add ADD BLOCK.
Then select CODE.

Then Make sure you have HTML as a type and copy & paste
AllAxis DIV DOM element

+ ADD BLOCK

Q Search

Content

Mode HTML Display Source Code

```

1 <!-- Add All Axis Product 3D Photo -->
2 <div
3   style="width:100%; width:660px; height: 460px"
4   data-allaxis-client="helen_kirkum"
5   data-allaxis-product="palimpsest_right"
6   data-allaxis-animate="2"
7 >
8
9   <!-- Set the following attribute above if you want to wr
10    a selected Shopify gallery image:
11     data-allaxis-wrap-shopify-gallery="image unique id"
12   -->
13   <!-- Wrap Shopify gallery here -->
</div>

```

You can specify the height manually.
